## EDUCATION

---

**BS in Data Science & Applications**, Indian Institute of Technology Madras May '25 — Present

**B.Tech in Electronics and Communication Engineering**, Shri Mata Vaishno Devi University, Katra Aug '25 — Present

## EXPERIENCE

---

**Research Intern** Jun '26 — Jul '26

National Institute of Technology Patna [Link](#) Patna, Bihar, India

- Submitted a 28-page structured review report on "Large-Scale Data Processing with Parallel and Distributed Randomized Extreme Learning Machine Neural Networks", under Dr. Ayaz Ahmad (Dept. of Mathematics and Computing Technology, NIT Patna)
- Implemented ELM in Python/NumPy — trained a network in a single matrix step (Moore–Penrose pseudoinverse) instead of backpropagation, and verified it on XOR and sklearn datasets
- Showed how ELM training splits across machines using MapReduce: in a worked example, a 400 GB matrix problem became ~4 GB per machine on a 100-machine cluster
- Backed each concept with a runnable Python program on real data: streamed a 54K-row dataset at constant memory, measured a 2.57× speedup on 4 cores with a parallel bootstrap, and ran word-count MapReduce on a real text corpus

**Summer Intern** Jun '26 — Present

Afflatus Gravures Pvt. Ltd. Noida, UP, India (Remote)

- Working in the Robotics Section on Automated Defect Detection in Rotogravure Cylinders using Computer Vision

## PROJECTS

---

**Python Mini-Projects (5)** [Link](#)

- Built 5 terminal apps in Python (Expense Tracker, Snake Game, Football Match Predictor, QR Code Generator, Typing Speed Test) using OOP, Pandas, Matplotlib, and qrcode; each with documented READMEs

## TECHNICAL SKILLS

---

**Languages** Python, C

**Data Stack** NumPy, Pandas, Matplotlib, Scikit-learn

**Tools** Git, GitHub, MATLAB, Google Sheets, Microsoft Excel
